WORK EXPERIENCE

UI Developer *July 2013 – Present*
EFFECTIVEUI, ROCHESTER, NY

Provide client-side development for various web and mobile applications, leveraging modern tools and frameworks such as AngularJS, Sass, Grunt, Karma, and PhoneGap. Communicate with designers and product owners to determine the best ways to develop intuitive, highly usable web and mobile products. Write blog posts about development trends and best practices.

User Interface Designer *August 2012 – June 2013*
SINGLEBROOK TECHNOLOGY, ITHACA, NY

Contributed UX and design solutions to a variety of higher education and non-profit client projects, including wireframes, mock-ups, and front-end design implementation. Created system for documenting company workflow and project management.

Lab Assistant & Student Manager *September 2011 – May 2012*
RIT SCHOOL OF PRINT MEDIA, ROCHESTER, NY

Maintained labs and assisted students in preparing digital files. Updated and restructured Standard Operating Procedures. Improved existing workflows with online versions of traditionally print forms.

Freelance Consultant *October 2011 – January 2012*
SOLOMON R. GUGGENHEIM MUSEUM, NEW YORK, NY

Updated site content and handled internal web requests.

PROFESSIONAL EXPERIENCE

Adopting Angular in Existing Applications *May 7. 2015*
NGVEGAS CONFERENCE, LAS VEGAS, NV

Spoke to several hundred Angular developers about the common pitfalls that can occur when integrating AngularJS into existing applications, and how to work through them efficiently.
